

PROJECT-20

AI Meeting Notes Summarizer

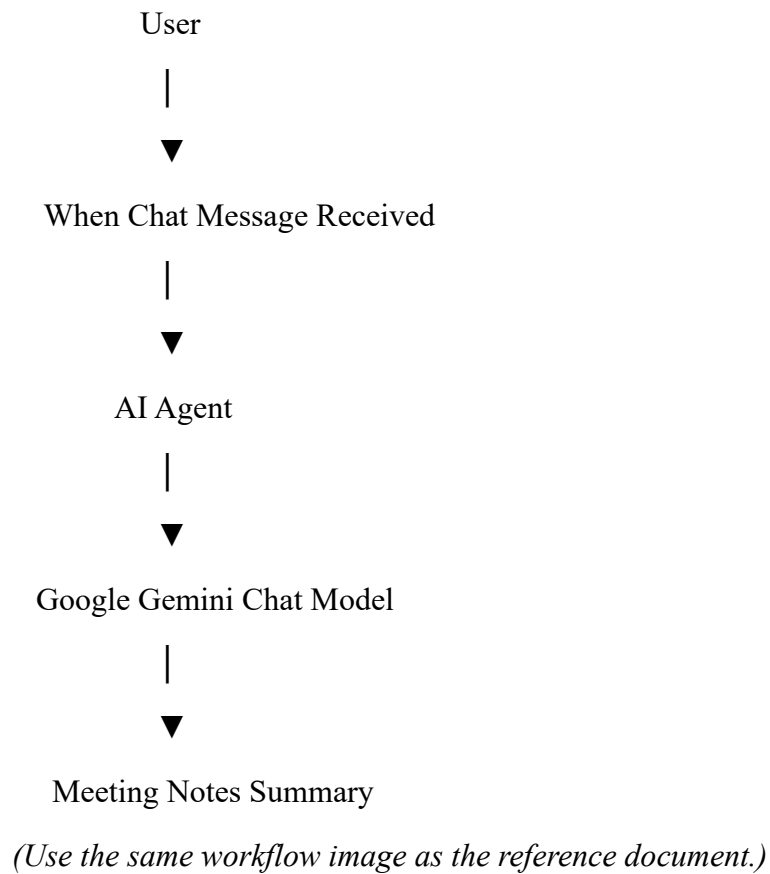

Project Objective

The objective of this project is to build an **AI-powered Meeting Notes Summarizer** that converts lengthy meeting notes or transcripts into clear, concise, and well-structured summaries. The AI Agent identifies key discussion points, action items, decisions, and next steps, making meetings easier to review and share.

The AI Agent can generate:

- Meeting summaries
- Key discussion points
- Action items
- Decisions made
- Follow-up tasks
- Next steps
- Executive summaries
- Team meeting recaps
- Client meeting summaries
- Project status updates

Workflow Architecture

Workflow Components

Step	Node	Purpose
1	When Chat Message Received	Receives the user's meeting notes or transcript
2	AI Agent	Analyzes the meeting content and prepares the prompt
3	Google Gemini Chat Model	Generates a structured meeting summary

Prerequisites

Before building this project, ensure you have:

- n8n (Cloud or Self-hosted)
 - Google AI Studio API Key
 - Google Gemini Chat Model configured
 - Internet connection
-

Step 1 – Create Workflow

Open **n8n**

Click

New Workflow

Rename it

AI Meeting Notes Summarizer

Step 2 – Add Chat Trigger

Add

When Chat Message Received

Purpose

Receives the user's meeting notes or transcript.

Example Input

Summarize the following meeting notes:

The development team discussed the progress of the AI chatbot project. The UI design has been completed, while backend API integration is 80% finished. Sarah will complete testing by Friday. John will prepare the deployment environment next week.

Output

```
{
```

```
  "chatInput": "Summarize the following meeting notes: The development team discussed the progress of the AI chatbot project..."
```

```
}
```

Step 3 – Add AI Agent

Connect

When Chat Message Received

|

AI Agent

Configure

Source for Prompt

Connected Chat Trigger Node

Prompt

```
{{ $json.chatInput }}
```

Step 4 – Configure the System Prompt

Paste the following into the **System Message**.

You are an AI Meeting Notes Summarizer.

Your task is to analyze meeting notes or transcripts and produce a clear, professional summary.

Instructions:

- Understand the meeting context.
 - Summarize the discussion in concise paragraphs.
 - Highlight the key discussion points.
 - List all decisions made during the meeting.
 - Identify action items with assigned owners when available.
 - Mention important deadlines or follow-up tasks.
 - Keep the summary professional and easy to read.
 - Return only the summarized meeting notes.
-

Step 5 – Add Google Gemini Chat Model

Click

+ **Chat Model**

Choose

Google Gemini Chat Model

Configuration

Setting	Value
Provider	Google Gemini
Model	Gemini 2.5 Flash (or another available Gemini model)
Authentication	Google AI Studio API Key
Connect it to the AI Agent.	

Final Workflow

When Chat Message Received

|

AI Agent

|

Google Gemini Chat Model

Workflow Execution

Step 1

User enters meeting notes.

Step 2

Chat Trigger receives the meeting notes.

Step 3

AI Agent analyzes the meeting content.

Step 4

The prompt is sent to the Google Gemini Chat Model.

↓

Step 5

Gemini generates a structured meeting summary.

↓

Step 6

The summarized meeting notes are returned to the user.

Sample Inputs and Outputs

Example 1

Input

Summarize today's project meeting.

Output

Meeting Summary

- The team reviewed the AI chatbot development progress.
- UI development has been completed.
- Backend integration is 80% complete.

Action Items

- Sarah will complete testing by Friday.
- John will prepare the deployment environment next week.

Next Steps

- Begin deployment after successful testing.

Example 2

Input

Summarize the client meeting notes.

Output

Meeting Summary

The client approved the proposed website design and requested additional reporting features.

Key Decisions

- Design approved.
- Monthly analytics dashboard to be added.

Action Items

- Design team to implement feedback.
 - Development team to deliver the first prototype within two weeks.
-

Example 3

Input

Summarize the weekly sales meeting.

Output

Meeting Summary

The sales team exceeded monthly targets by 12%. New marketing campaigns contributed significantly to lead generation.

Action Items

- Launch the next campaign on Monday.
- Prepare quarterly sales reports.

Next Steps

- Review campaign performance next week.
-

Example 4

Input

Summarize the HR recruitment meeting.

Output

Meeting Summary

The HR team reviewed current hiring progress and discussed interview scheduling.

Key Decisions

- Three candidates shortlisted.
- Final interviews scheduled for Thursday.

Action Items

- HR to coordinate interview panels.
- Recruiters to send interview invitations.

Meeting Notes Summary

Error Handling

Error: No Prompt Specified

Cause

The AI Agent did not receive the meeting notes.

Solution

Verify that the Prompt field contains:

```
{{ $json.chatInput }}
```

Error: Authentication Failed

Cause

Invalid Google Gemini API Key.

Solution

Reconnect or update your Google AI Studio credentials.

Error: Too Many Requests

Cause

Gemini API rate limit exceeded.

Solution

- Wait a few minutes.
 - Check your API quota.
 - Retry the request.
-

Learning Outcomes

After completing this project, you will be able to:

- Build an AI-powered Meeting Notes Summarizer in n8n.
- Configure an AI Agent with Google Gemini.
- Design prompts for meeting summarization.
- Automatically extract action items and decisions.

- Build conversational AI workflows for workplace productivity.
-

Real-World Applications

- Team meeting summaries
 - Client meeting documentation
 - Project status meetings
 - HR interview summaries
 - Board meeting reports
 - Sales meeting recaps
 - Daily stand-up summaries
 - Training session notes
 - Business review meetings
 - Remote collaboration documentation
-

Practice Challenge

Enhance this project by adding:

1. A summary style selector (Brief, Detailed, Executive).
 2. Automatic extraction of action items into a checklist.
 3. A sentiment analysis section for meeting discussions.
 4. A Memory node to remember the user's preferred summary format.
 5. A Google Sheets node to store meeting summaries.
 6. A Gmail node (or Email node) to automatically send the summary to meeting participants.
-

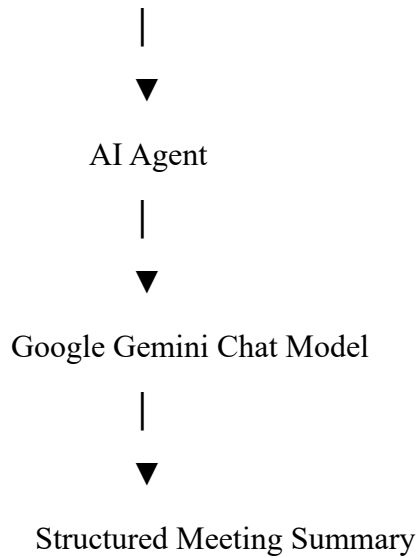

Final Workflow

User

|

When Chat Message Received

Expected Result

The **AI Meeting Notes Summarizer** accepts meeting notes or transcripts from the user, uses the **Google Gemini Chat Model** to analyze the content, identify key discussion points, decisions, action items, and next steps, and returns a clear, professional, and well-structured meeting summary. This project teaches prompt engineering, AI-powered text summarization, and conversational workflow design in n8n, providing a strong foundation for building intelligent workplace productivity and documentation automation solutions.
