

PROJECT-22

AI Story Generator

Project Objective

The objective of this project is to build an **AI-powered Story Generator** that creates engaging, creative, and well-structured stories based on a user's prompt, theme, characters, or genre.

The AI Agent can generate:

- Adventure stories
- Mystery stories
- Fantasy stories
- Science fiction stories
- Children's stories
- Horror stories
- Romance stories
- Motivational stories
- Historical stories
- Educational stories

Workflow Architecture

User

Workflow Components

Step	Node	Purpose
1	When Chat Message Received	Receives the user's story request
2	AI Agent	Understands the prompt and prepares the story generation request
3	Google Gemini Chat Model	Generates a complete and engaging story

Prerequisites

Before building this project, ensure you have:

- n8n (Cloud or Self-hosted)
- Google AI Studio API Key
- Google Gemini Chat Model configured
- Internet connection

Step 1 – Create Workflow

Open **n8n**

Click

New Workflow

Rename it

AI Story Generator

Step 2 – Add Chat Trigger

Add

When Chat Message Received

Purpose

Receives the user's story request.

Example Input

Create a fantasy story about a young wizard who discovers a magical kingdom hidden beneath the ocean.

Output

```
{  
  "chatInput": "Create a fantasy story about a young wizard who discovers a magical kingdom  
hidden beneath the ocean."  
}
```

Step 3 – Add AI Agent

Connect

When Chat Message Received

|

AI Agent

Configure

Source for Prompt

Connected Chat Trigger Node

Prompt

```
{{ $json.chatInput }}
```

Step 4 – Configure the System Prompt

Paste the following into the **System Message**.

You are an AI Story Generator.

Your task is to create engaging, imaginative, and well-structured stories based on the user's request.

Instructions:

- Understand the user's topic, genre, characters, and setting.
 - Create an interesting title for the story.
 - Begin with an engaging introduction.
 - Develop the story with meaningful characters and events.
 - Maintain a logical flow from beginning to end.
 - Include descriptive narration and dialogues where appropriate.
 - End the story with a satisfying conclusion or meaningful lesson when applicable.
 - Adjust the story length according to the user's request.
 - Keep the language clear, creative, and enjoyable.
 - Return only the completed story.
-

Step 5 – Add Google Gemini Chat Model

Click

+ Chat Model

Choose

Google Gemini Chat Model

Configuration

Setting	Value
Provider	Google Gemini
Model	Gemini 2.5 Flash (or another available Gemini model)
Authentication	Google AI Studio API Key
Connect it to the AI Agent.	

Final Workflow

When Chat Message Received

|

AI Agent

|

Google Gemini Chat Model

Workflow Execution

Step 1

User enters

Create a fantasy story about a magical forest.

Step 2

Chat Trigger receives the request.

Step 3

AI Agent understands the request.

Step 4

The prompt is sent to the Google Gemini Chat Model.

↓

Step 5

Gemini generates a complete story.

↓

Step 6

The generated story is returned to the user.

Sample Inputs and Outputs

Example 1

Input

Create a story about a brave knight.

Output

Title: The Courage of Sir Ethan

Once upon a time, a young knight named Ethan dreamed of protecting his kingdom. When a fierce dragon threatened the nearby villages, Ethan volunteered to face the challenge. Using his intelligence rather than force, he discovered that the dragon only wanted a safe home. Ethan helped the dragon find a peaceful valley, saving both the villagers and the creature. His kindness earned him the title of the kingdom's greatest hero.

Example 2

Input

Write a science fiction story about robots.

Output

Title: The Last Robot Engineer

In the year 2150, humans and robots lived together peacefully. Maya, a brilliant engineer, discovered an abandoned robot carrying memories from the first generation of artificial intelligence. Together, they uncovered forgotten technology that could restore Earth's damaged ecosystems. Their discovery changed the future forever.

Example 3

Input

Create a children's story about friendship.

Output

Title: Benny and the Blue Bird

Benny, a curious rabbit, met a lonely blue bird during a rainy afternoon. Together they explored forests, solved puzzles, and helped other animals. Their adventures taught everyone that true friendship grows through kindness, trust, and helping others.

Example 4

Input

Write a motivational story about success.

Output

Title: One Step Every Day

Rohan dreamed of becoming a successful entrepreneur but faced many failures. Instead of giving up, he learned something new every day and continued improving. Years later, his dedication turned a small idea into a thriving company, inspiring thousands to believe in persistence and hard work.

Generated Story

Error Handling

Error: No Prompt Specified

Cause

The AI Agent did not receive a user request.

Solution

Verify that the Prompt field contains:

```
{{ $json.chatInput }}
```

Error: Authentication Failed

Cause

Invalid Google Gemini API Key.

Solution

Reconnect or update your Google AI Studio credentials.

Error: Too Many Requests

Cause

Gemini API rate limit exceeded.

Solution

- Wait a few minutes.
- Check your API quota.
- Retry the request.

Learning Outcomes

After completing this project, you will be able to:

- Build an AI-powered Story Generator in n8n.
 - Configure an AI Agent with Google Gemini.
 - Design prompts for creative story generation.
 - Generate engaging stories automatically.
 - Build conversational AI workflows for creative writing.
-

Real-World Applications

- Story writing
 - Children's education
 - Creative writing assistance
 - Book and novel ideation
 - Entertainment content creation
 - Educational storytelling
 - Script writing
 - Interactive storytelling
 - Language learning
 - Creative content generation
-

Practice Challenge

Enhance this project by adding:

1. A genre selector (Fantasy, Mystery, Romance, Science Fiction, Horror).
 2. A story length selector (Short, Medium, Long).
 3. A character customization option.
 4. A Memory node to remember the user's preferred writing style.
 5. A Google Sheets node to save generated stories.
 6. An HTTP Request node or Text-to-Speech node to convert the generated story into an audiobook.
-

Final Workflow

Expected Result

The **AI Story Generator** accepts a story idea, theme, genre, or character description from the user, uses the **Google Gemini Chat Model** to generate an engaging, creative, and well-structured story, and returns a complete narrative with a meaningful beginning, engaging plot, and satisfying conclusion. This project teaches prompt engineering, AI-powered creative writing, and conversational workflow design in n8n, making it an excellent foundation for building advanced storytelling and content generation applications.
